

Strips Multi-sensor +Guard for LoRaWAN

Strips +Guard is a revolutionary magnetic contact sensor for monitoring windows, doors, and valuables.

The **invisible window & door sensor** with up to **10 km range & 10 years** of battery life.

High quality for both **in & outdoor** applications, it is the ideal sensor for any professional IoT application. Strips MS +Guard is a multi-sensor that can also be used for temperature measurements.

- **Open/close detection**
- **Magnetic contact sensor**
- **Indoor or outdoor use**
- **Ultra-thin (3mm/0.12in) design**
- **Up to 10-year battery lifetime**
- **Up to 10 km (6 miles) range**
- **Easy installation**

DESCRIPTION

STRIPS MS +GUARD FOR SMART BUILDINGS

Sensitive's MS +Guard - the ultra-slim magnetic sensor for monitoring windows and doors, gates, and drawers. The unique form factor enables hidden installations inside the window or door frame or other narrow spaces. Its long battery life of up to 10 years and impressive range of up to 10 km sets it apart, making it perfect for indoor and outdoor IoT applications. The added feature of temperature measurement provides a comprehensive overview of the climate in and around your property. The sensor can be configured to function solely as a beacon, but only when the door or window is open. This feature is particularly beneficial for scenarios involving metal doors or windows, where it can be used to control air conditioning units or alarm systems effectively.

As a multi-sensor, MS +Guard is flexible and customizable to suit your specific needs, making it a valuable investment for your company's operations. It's ideal for businesses looking to modernize their IoT and PropTech, optimize energy usage, automate processes, and enhance property protection.

If you utilize your sensors with a smart building system or our horizontal IoT platform Yggio, you will have a multitude of possibilities thanks to the systems interoperability services. What this means is that you can connect Strips to other IoT devices, systems, and services no matter which technology or protocol, for example, to initiate an alarm if the door is opened or turn off the ventilation when a window has been opened.

BENEFITS:

- Blend-in design (<3mm)
- No maintenance (10 years)
- Long-range (10 km)
- Simple installation & mounting
- Low-lifecycle cost (multi-sensor, multi-purpose)

SPECIFICATION

Application

Application Security, Room sensor, Window and door monitoring

Benefits

Benefits Blend-in design, No maintenance (10 years), Long-range (10 km), Simple installation & mounting, Low-lifecycle cost (multi-purpose multi-sensor)

In/Outdoor usage Indoor & Outdoor

Features

Sensor Open/Close, Temperature

Functionality Tamper alert

Firmware update over the air (FOTA) No

Connectivity data

Frequency EU868 - Europe 863-870 MHz or AS923 - Asia 915 - 928 MHz or US915 - US 902 - 928 MHz or AU915 - Australia 915 - 928 MHz or JP920 - Japan or IN865 - India

Protocols / Connectivity LoRaWAN

LoRaWAN version V 1.0.4

LoRaWAN class Class A

Antenna Integrated

Sensor data

Temperature accuracy ± 1 °C/ 1.8 °F @ 0-30 °C/32-86°F

Sensor type Magnetic contact

Power supply

Powered by Battery, Built-in battery (LiMnO₂), 1,4 Wh (480 mA @ 3V), Non rechargeable battery

Operating Conditions

Operating temperature (max) +60°C

Operating temperature (min) -20°C

IP Class 67, 67

Mechanical data

Weight (g) 11

Width (mm) 15

Height (mm) 3
