

Lithium button-cell batteries

# Come to us for eco-friendly, energy-saving batteries

Our units last longer and boast higher capacities than the industry average

The featured lithium button-cell batteries are perfect for powering a variety of devices, including 3-D glasses and remote controls. And since they boast higher capacities and longer life spans than many other units on the market, they are better for the environment as well. Our CR2032 cells, for instance, have a capacity of 245mAh – that's up to 5 percent higher than similar CR2032 cells from Japan. Our current collection includes:

Model	Capacity
CR2016	90mAh
CR2025	165mAh
CR2032	245mAh
CR2430	300mAh
CR2450	620mAh

Each item is manufactured at our 9,000m<sup>2</sup> ISO 9001:2008- and ISO 14001:2004-certified factory, where we turn out up to 25 million units monthly. Plus, our products meet UL 1642, UN 38.3, CE, JISC 8512 and IEC standards, as well as comply with RoHS Directive, Directive 2006/66/EC and REACH requirements. We are also an authorized distributor of Toshiba batteries.

To ensure quality, we conduct evaluations using precision equipment from the US, Switzerland and Taiwan. For more information regarding our batteries and to place an order, contact us now.
